RE: Comment on Net Neutrality

Dear FCC:

Please do not remove Title 2 from the Net Neutrality Act. This is the only real legal protection that individuals and small organizations have to ensure that those with more money and power cannot interfere with our access and use of the Internet which belongs to the government and, therefore, all of us. We paid to develop this technology with our tax dollars and it should belong to us. We pay for websites and domain names and other fees. The large corporations should not be able to shut us out or charge us for access. This is unfair and prevents us from having a platform for free speech and online communication.

Thank you,

Janet Alfieri
